

Process Technicians/Operators

II-VI Wide Band Gap Materials Group is currently in need of several high energy individuals working full time as Process Technicians in our Starkville, MS location. II-VI WBG manufactures semiconductor materials and is a rapidly growing division of II-VI INCORPORATED.

II-VI has several full time opportunities in the areas of characterization, quality assessment, substrate fabrication and polishing related to the manufacturing of semiconductor materials. Candidates should have a minimum of a high school and/or vocational school education. Some experience or knowledge of semiconductor manufacturing is a plus. Should be well organized with good problem solving abilities, attention to detail and a strong mechanical aptitude. Able to work independently, safely and effectively. Must be willing to work flexible shifts.

Interested candidates must be willing to spend a minimum 3 months in the Pine Brook, NJ facility for on the job training.

II-VI Incorporated offers an excellent benefits package including performance bonuses, a 401K program with substantial match, company health insurance, life insurance, paid vacation, paid holidays, and more.

Interested candidates should submit a current resume or contact:
